Subject: RE: VB I70 ready to use disposal facility Dad's (UNCLASSIFIED)

Hi JC - The DADs facility continues to be acceptable pursuant to the CERCLA Off-Site Rule. Here's the VCA

The OSR acceptability status is dynamic in nature and subject to change, Region 8 has instituted a policy where EPA conducts a verification of continued acceptability (VCA) on facilities that have been previously found acceptable under the CERCLA Off-site Rule (OSR) such as the Denver Arapahoe Disposal (DADs) Landfill facility in Colorado. The purpose of a VCA is to provide a periodic check to assure that the facility continues to be acceptable. VCAs are conducted when a request for OSR status is received and the previous VCA had been conducted more than 60 days prior. VCA are valid for 60-days.

A VCA was completed for the Denver Arapahoe Disposal facility on August 29, 2013, so the VCA is valid until October 29, 2013. CERCLA waste shipments sent to the Denver Arapahoe Disposal facility up until October 29th, are in full compliance with the OSR. If CERCLA wastes are planned to be sent after this date, please submit a request for a new VCA about a week or so prior to October 29th, so that a new VCA can be conducted at that time. Thanks.

Terry J. Brown
Regional OSR Coordinator

Hello Mr. Brown. I am forwarding the below information to you regarding the VB/I-70 site. Paula Schmittdiel is the RPM, but she is out today, so I thought I would get this going for her.
Thank you,
-jc

Paula,

We anticipate excavating this week and transporting the soils to DADS.

FYI - When we are about a week out from beginning excavation at OUL, please let me know so that Terry Brown, EPA Offsite Coordinator for Region 8 can contact the State of Colorado for "verification of continued acceptability" (VCA) for the DADs facility or whichever disposal facility we will be using . See email trail below. I' ve copied Terry Brown on this email for your convenience.

Thanks

Subject: FW: Dad's

Paula and Steve - I received the below from Terry Brown the Regional Offsite Coordinator for Region 8. He can update this once he knows approximately when waste will start to be sent to DADs.

However, since this work is not a Superfund cleanup, an offsite acceptability determination is not required. See 40 CFR 300.440.

Subject: Dad's

Hey Richard - Yes, Denver/Arapahoe Disposal (DADs) solid waste landfill has been evaluated and is currently acceptable. If waste is expected to be sent to DADs. Please let me know when so that I can conduct a new verification of continued acceptability which are good for 60 days. Here's the latest VCA:

The Denver Arapahoe Disposal (DADs) Landfill Facility in Colorado continues to be acceptable. Here's the verification of continued acceptability (VCA):

The OSR acceptability status is dynamic in nature and subject to change, Region 8 has instituted a policy where EPA conducts a verification of continued acceptability (VCA) on facilities that have been previously found acceptable under the CERCLA Off-site Rule (OSR) such as the Denver Arapahoe Disposal Landfill facility in Colorado. The purpose of a VCA is to provide a periodic check to assure that the facility continues to be acceptable. VCAs are conducted when a request for OSR status is received and the previous VCA had been conducted more than 60 days prior. VCA are valid for 60-days.

A VCA was completed for the Denver Arapahoe Disposal facility on April 22, 2013, so the VCA is valid until June 22, 2013. CERCLA waste shipments sent to the Denver Arapahoe Disposal facility up until June 22nd, are in full compliance with the OSR. If CERCLA wastes are planned to be sent after this date, please submit a request for a new VCA about a week or so prior to June 22nd, so that a new VCA can be conducted at that time. Thanks.
